

One Mission. One Platform. One Process.

Validation Automation for Regulated Systems.

At Sware, our mission is to help reduce risk to patients by transforming how the life sciences industry manages compliance of regulated technology solutions. Computer System Validation (CSV) hasn't changed in over two decades and that's why it is our singular vision to make CSV paperless, seamless, and stressless.

Today, leading life sciences, medical device, and software development organizations rely on Res_Q™ as their trusted validation automation platform. It's their single source of validation truth to release more products to users, accelerate implementation, and ensure compliance across the enterprise.

Res_Q: Built by Validation Experts for Validation Experts.

We've been there. We know compliant validation is hard work. That's why we've built the platform we wish we always had. Res_Q features pre-built Compliance Modules for intelligent workflow automation, structured risk assessments, and automated testing for more than 30 systems across the life sciences ecosystem. We partner closely with you every step of the way to help you accelerate compliance and deliver speed to users across the enterprise.

Speed Matters. Res_Q Delivers.

Equip your teams to accelerate software validation, improve efficiency & save money.

Up to

80%

reduction in
time spent
validating

Up to

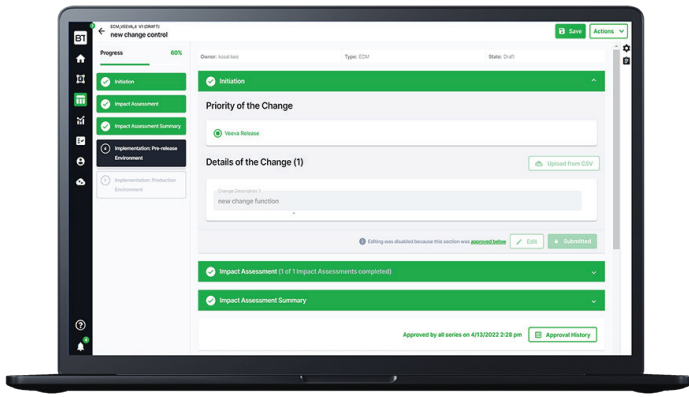

60%

less cost over
CSV lifecycle

Validation has always been a time-consuming and disconnected process throughout our organization. With Res_Q we're able to manage releases of multiple systems across our enterprise with ease—enabling us to maintain compliance overall.

– Leading Pharma Manufacturer

Trusted by top-tier life sciences leaders and innovative startups alike.

275+
Companies Moved to the Regulated Cloud

Discover Res_Q: Simply a Better Way to Validate.

Res_Q eliminates manual, paper processes and disparate workflows to empower compliance teams to become more efficient.

Through intelligent workflow automation, built-in templates, test scripts, and compliance modules, Res_Q layers into existing regulated platforms like OKTA, Veeva, DocuSign, NetSuite, Nuvolo, and much more.

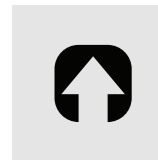

The result? Sware customers implement validation up to 30% faster.

Put Your Validation on the Launch Pad to Productivity.

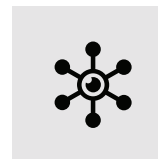

Sware has partnered with more than 275 life sciences companies to make the move to the regulated cloud. Res_Q is the compliance engine of choice behind some of the world's leading software developers for regulated apps.
