

# Res\_Q™ Validation Automation Platform

Res\_Q helps exceed customer expectations, while directly addressing the FDA’s goal.

Whether software applications are designed to support drug discovery and clinical trial design, or next-generation medical devices, the truth is compliant software validation is complex, time-consuming, and expensive.

It’s with this in mind that Sware launched Res\_Q, an end-to-end validation automation platform. Res\_Q helps exceed customer expectations, while directly addressing the FDA’s goal to enhance quality and patient safety through automation and structured risk assessment.

## Implement Faster

Reduce the time it takes to get new systems to users by 30%

## Scale Quicker

Mitigates management burden that new systems place on validation teams by 80%

## Increase Value

Reduces the friction with adopting new features and business processes

As a trusted AI software provider for pharma companies, we understand the necessity of compliance to deliver our reliable solutions. When we were just breaking into this regulated industry, validation was our first priority. Sware helped us establish a quality foundation. Now with Res\_Q, we have the right tool to meet our immediate compliance needs and to scale with the increasing AI demand from our pharma clients.

– Taylor Chartier, CEO, Modicus Prime

## Validation Transformation Simplified

Res\_Q is the leading audit-ready, source-of-validation-truth for software developers of regulated applications. Designed and built by validation experts to deliver 100% process adherence through automated workflows, testing, and streamlined decision-making, Res\_Q provides inspectable evidence for structured risk assessment.

At Sware, we have a voracious appetite for velocity and we know that speed matters when it comes to software development, implementation, and release management. Sware's Res\_Q platform enables teams to accelerate software validation, so key resources can spend more time on strategic, innovation-driven efforts.

### One Platform – One Source of Truth

- ✔ Enterprise Validation Dashboard
- ✔ User-Tailored Workspace
- ✔ Intelligent Impact Assessments
- ✔ Templates & Tests Manager
- ✔ Built-In Analytics & Reporting
- ✔ Task Lists, Alerts & Notifications
- ✔ Customizable Profile
- ✔ Role-Based Authentication
- ✔ Pre-Built Compliance Modules

#### Development

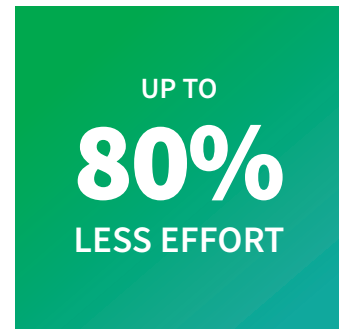

Optimizes the development of products for regulated environments

#### Implementation

Deliver software faster and more consistently

#### Release Management

Controlled deployment of new releases to regulated customers

If you're ready to bring software validation under control, let's get together.
